

## Cambist coin tables

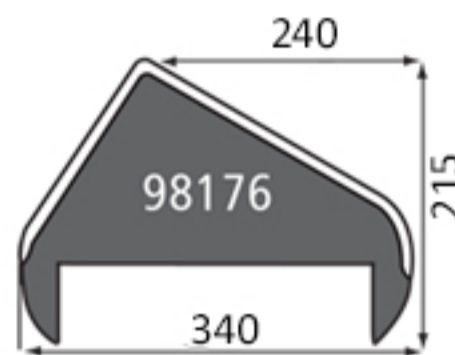

This is our current coin table range and replaces the coin table information in our brochure.

**Cambist coin tables** are made of an ABS-plastic shell with a wooden core. The ABS surface looks similar to the interior (dash board) of the bus. This new choice of material has been very appreciated for blending into the interior and also for creating less sun reflections. The later actually being considered a safety issue by some operators.

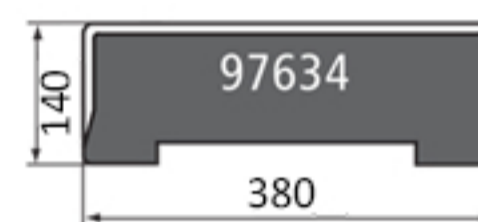

All measurements are in millimeters.

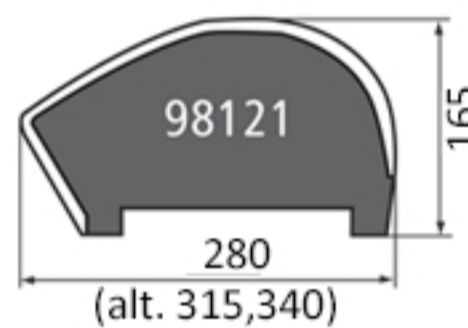

**Item no. 98165**
